

ZIMSTAT Launches the Census Executive Monitoring Mobile App

The Zimbabwe National Statistics Agency (ZIMSTAT) proudly presents the **Executive Census Monitoring Mobile App**, a mobile application designed to provide easy access to census data for effective planning and decision-making. This innovative application enables policymakers, researchers, and stakeholders to monitor and analyze Zimbabwe's census data effortlessly.

What's in the Application? The app provides census data, disaggregated by:

- a. Provinces – View population figures for each province.
- b. Districts – Access detailed data at the district level.
- c. Sex – Analyze population distribution by gender (sex).
- d. Urban & Rural Areas – Compare demographic trends between urban and rural regions.
- e. Age Groups – Gain insights into population structure by age (shows a population pyramid).

How to Get the App? The Executive Census Monitoring Mobile App is now available for download on: 📱 Google Play Store – Search for “Zimbabwe Census Exec Monitor” and install the app on your mobile device.

<https://play.google.com/store/apps/details?id=com.zim.cem>

Why Use the App? a. Easy Access – Get census data anytime, anywhere.

- b. Data Visualization – Interactive charts and tables for better analysis.
- c. Reliable & Official – Accurate information from ZIMSTAT.
- d. User-Friendly Interface – Simple navigation for quick access to key census statistics and Census trends.

Stay Informed with ZIMSTAT Make informed decisions backed by reliable census data. Download the Zimbabwe Census Exec Monitor Mobile App today and stay updated on Zimbabwe's demographic landscape.
