- **Period of Data Collection**

It is important to note that data on prices were collected during the period 10th to 13th August 2023. The changes in prices in this report refer to that period of data collection.

The Methodology

With effect from June 2020 ZIMSTAT is publishing the new Consumer Price Index (CPI). The index measures the combined price changes of goods and services in both the USD and ZWL.

Two separate indices were computed, that is, the USD Consumer Price Index and the ZWL Consumer Price Index. The original CPI weights were split into USD and ZWL components using linking factors. These linking factors were proportions of estimated household expenditure in USD and ZWL according to the COICOP classification. The resultant weights were then used to combine the two indices to come up with the blended index.

Mean Month-on-Month Rates

The mean-month-on month inflation rate from January to August 2023 was 8.8. The mean-month-on month inflation rate from January to December 2022 was 6.3. The mean month-on-month inflation rate for the period January to December 2021 was 1.9 percent.

Rebasing of the Consumer Price Index

From August 2020 onwards, the CPI was rebased to July 2020 = 100. This was caused by the revision of the linking weights between the United States Dollar CPI and the ZWL CPI

For users who wish to continue with the old index reference period of June 2019 = 100, they should multiply the new All Items Index with the factor 6.49960354088181
